

Save Time. Save Money. Reduce Waste.

CheckMATE Wireless Valve Control

- CheckMATE offers high tech convenience.
CheckMate is a wireless remote control of sprayer sections that are OEM equipped with KZValve electric shutoffs.
- CheckMATE quickly pays for itself.
Improved nozzle performance will reduce product waste and time tending to clogged nozzles.
- CheckMATE makes your operation more environmentally friendly.
No one can argue the benefits of reduced product waste on the environment.
- CheckMate savings add up.
Custom spraying can easily cost \$6 an acre. At 1-2 acres per minute coverage, that's \$6-\$12 per minute of lost opportunity income whenever you need extra time to check for plugged nozzles.

Increase your profits by insuring less down time and fewer re-sprays.
